

HOW TO CLEAN CARPET WITH A CARPET BONNET

Purpose

To maintain a pleasing appearance and obtain maximum carpet life through the removal of dirt and soil.

Supplies and Equipment

1. **Insert our product here**
 2. 175 rpm floor machine
 3. Mop bucket with wringer
 4. Vacuum
 5. Carpet cleaning solution
 6. Trigger sprayer and/or Pressure sprayer
 7. Putty knife
 8. Hazard signs
 9. Carpet Pad (**Lundmark**)
 10. Carpet Mop
-

Procedure

1. Prepare the area:
 - a) Place hazard signs in easy-to-see locations at entrances to the area being cleaned.
 - b) Move furniture. Work around heavy furniture and equipment that cannot be moved.
 - c) Vacuum area to be cleaned.
 - d) Remove gum and other foreign material.
 - e) Bring equipment to the area.
2. Prepare the cleaning solution according to the manufacturers instructions.
3. Spray the solution onto 10sq. ft. of area with a trigger sprayer or pressure sprayer.
4. Let stand 5-10 minutes to allow the solution to loosen dirt.
5. Soak the **Lundmark** Insert product (two) in the mop bucket with water. Wring out one to use while other continues to soak.

6. Place the bonnet under the floor machine and center it. Floor machines move to the right when you pull up on the handle and move left when you push down.
7. Begin cleaning by outlining the perimeter and then run the machine in overlapping strokes. When completed, you should soak the first bonnet (step 5) and repeat cleaning the area with the 2nd bonnet in and opposite criss-cross direction, overlapping the strokes as before.
8. Return the bonnet to soak while you repeat step 3 and follow through, alternating bonnets until the job is complete.
9. As an option, the carpet can be brushed with a carpet groomer.

Accomplishment

By following this procedure, the carpet will be clean and free of soil and heavy dirt deposits.

- For a light cleaning, follow the steps outlined above and make these changes:
 4. Let the solution soak for 2 to 3 minutes to loosen the dirt.
 7. Begin cleaning by running the machine in overlapping strokes and feather the edges at the perimeter of your area to be cleaned. Follow up by using a carpet mop to clean the area next to the baseboard.
- Your **Lundmark** Insert product here is also an excellent means for cleaning your walk off mats:
 1. Begin by shaking large soil from the mat and follow up with a good vacuuming in both directions.
 2. Spray with carpet cleaning solution and buff with your **Lundmark** Insert product here in overlapping strokes. This will clean and maintain your walk off mats so they can reduce the amount of soil brought into your traffic area.

5 Components to a well maintained, clean carpet

1. Use and care of walk off mats.
2. Regularly scheduled vacuuming.
3. Spot cleaning & gum removal.
4. Traffic area cleaning.
5. Renovation (heavy cleaning of entire carpet area).
